# CRIMP-ALL®

CAT NO. 05920

MODULAR CONNECTOR CRIMPING TOOL

- Strips and crimps all telephone modular connectors and cordage.
- Steel frame, vertical crimping motion.
- Fast exchange of punch and die sets ensures the ability to change the settings instantly, to suit all crimping requirements.
- Produces 6mm and 12.5mm stripping lengths.
- Provides dual strain relief crimps for maximum pull-out strength.

INTERNATIONAL PATENTS APPLIED FOR

Designed for the professional installer who does not have the time to troubleshoot and repair crimps that have not made a satisfactory connection.

This single lever-action tool not only crimps all types of line plug connectors but also prepares the cordage prior to insertion into the connector - allowing the termination of cords to be prepared in seconds using only one tool. The Crimp-All is a quality tool manufactured to precise standards which guarantees exchangeability of dies and punches to produce dual strain relief crimps to a variety of connectors. Exchange of die and punch sets is performed in seconds with a guarantee of precise reproduction of quality crimps. The possibility of faulty crimps is eliminated as the tool is equipped with a ratchet operated *safe-crimp* mechanism which will not release the handles until the punch has reached the end of its travel and the correct crimp has been made.

TO CHANGE PUNCH AND DIE SETS

1.   Remove die retaining screw and push out die.

2.   Slide out punch retaining springs and remove the punch.

3.   Fit replacement punch and die and reverse procedure.
